# European Parliament Eurobarometer Flash survey (EB flash 341) 

## ANALYTICAL SYNTHESIS

| Coverage: | EU 27 (25 539 European citizens) |
| :--- | :--- |
| Population: | Europeans aged 15 or over |
| Methodology: | Phone (CATI) |
| Fieldwork: | 19 and 21 January 2012, carried out by TNS Opinion |

INTRODUCTION ..... 3
I. GENDER INEQUALITIES ..... 5
II. PAY GAP BETWEEN WOMEN AND MEN ..... 8
III. MEASURES TO TACKLE THE PAY GAP ..... 12
ANNEX ..... 16

## INTRODUCTION

This year, on International Women's Day (8 March), the European Parliament will be focusing on the pay gap between women and men.

In this connection, Parliament asked TNS Opinion to carry out a Flash telephone survey, which was conducted on 19 and 20 January 2012 among 25539 European citizens in the 27 EU Member States.

The questions focused on the pay gap, as well as a number of other topics. TNS Opinion's report gives a detailed account of the survey's findings, which mainly concern child-minding responsibilities and gender issues at work.

Before outlining the main trends highlighted by the survey, it is worth pointing out that the six most populated Member States account for some $\mathbf{7 0 \%}$ of the EU average. Each of the findings should therefore also be viewed in the context of all the national results which are set out in the tables in this summary and in TNS Opinion's report.

When asked about the seriousness of gender inequalities in their country, $52 \%$ of Europeans (W 58\%; M 46\%) viewed them as a 'serious' problem, while 45\% thought the opposite. An absolute majority of respondents in 10 of the Member States considered them to be a serious problem.

For each question, reading TNS Opinion tables, shows how the differences between Member states can sometimes be important.

## GENERAL TRENDS

> Unsurprisingly, women see gender inequalities in general, and the pay gap in particular, as more of a problem than men do, with differences of 12 to 14 percentage points between the scores for the two groups.
$>60 \%$ of Europeans think that gender inequalities have tended to decrease over the last 10 years. However, almost a quarter of them (24\%) think that they have increased, while $12 \%$ say spontaneously that there has not been any change.
$>$ Europeans consider the most important gender inequality to be violence against women (48\%), closely followed by the pay gap (43\%). Trafficking in women and prostitution comes in third place with $36 \%$.
$>$ Europeans were asked more specifically about their view of the pay gap: 69\% (W 76\% and M 62\%) see it as a 'serious' problem. This is the majority view in 25 of the 27 Member States. Only $28 \%$ say that it is not a serious problem.
$>$ As regards the best level at which to tackle the pay gap, $47 \%$ of Europeans are in favour of action at EU level, $38 \%$ of action at national level and $11 \%$ of action at local or regional level.
$>$ Respondents were also asked about the measures which would do the most to reduce the pay gap between women and men. On this point, Europeans are divided on whether incentives or penalties would be more effective, with very similar scores being recorded for 'facilitating access for women and men to any type of employment' (27\%), 'imposing financial penalties on companies that do not respect gender equality' (26\%) and 'transparent pay scales in companies' (24\%).
N.B.: It is important for readers to bear in mind that survey findings are estimates, the accuracy of which, all things being equal, depends on the sample size and the percentages recorded. For samples of around 1000 interviews (which is the sample size generally used at Member State level), the actual percentage (i.e. that which would be obtained if the whole population were interviewed) varies within the following confidence intervals:

| Percentages recorded | $10 \%$ or $90 \%$ | $20 \%$ or $80 \%$ | $30 \%$ or $70 \%$ | $40 \%$ or $60 \%$ | $50 \%$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Confidence limits | $+/-1.9$ points | $+/-2.5$ points | $+/-2.7$ points | $+/-3.0$ points | $+/-3.1$ points |

## I. GENDER INEQUALITIES

## European averages

Q3 - In your opinion, which of the gender inequalities in the following list are the most important?

With regard to the various types of inequality, the following findings emerged:

- The pay gap between men and women ranks second with $43 \%$, between violence against women (48\%) and trafficking in women (36\%).
- Difficulties in gaining access to positions of responsibility for women come next in the rankings (small proportion of women in positions of responsibility in companies (30\%) and in politics (23\%)).
- Family issues, i.e. the unequal sharing of responsibilities and tasks between women and men in families, were cited by $22 \%$ of the respondents.

## > Differences between Member States

Q3 - In your opinion, which of the gender inequalities in the following list are the most important? First? And then?

Highest percentage per country
Highest percentage per item
Lowest percentage per country Lowest percentage per item

- Violence against women ranks first in 12 of the 27 Member States, with the highest scores being recorded in Spain (74\%), Sweden (64\%) and Romania (62\%).
- The pay gap comes first in 12 Member States, with the highest scores being recorded in Austria (61\%), Germany (59\%) and Finland (57\%).
- Trafficking in women and prostitution is seen as the most important gender inequality in three Member States, namely Denmark (60\%) and Ireland and the Netherlands (both 48\%).

## Sociodemographic analysis:

Q3 - In your opinion, which of the gender inequalities in the following list are the most important?

|  | Violence against women | The pay gap between women and men | Trafficking in women, prostitution | The small proportion of women in positions of responsibility in companies | The small proportion of women in positions of responsibility in politics | The unequal sharing of responsibilities and tasks between women and men in families | The persistence of sexist stereotypes | Other (SPONTANEOUS) | Don't know |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| EU27 | 48\% | 43\% | 36\% | 30\% | 23\% | 22\% | 13\% | 2\% | 4\% |
| 3. Gender |  |  |  |  |  |  |  |  |  |
| Male | 46\% | 39\% | 36\% | 29\% | 24\% | 20\% | 13\% | 2\% | 4\% |
| Female | 50\% | 46\% | 35\% | 32\% | 23\% | 25\% | 12\% | 1\% | 3\% |
| 囬 Age |  |  |  |  |  |  |  |  |  |
| 15-24 | 51\% | 38\% | 44\% | 27\% | 22\% | 24\% | 18\% | 1\% | 2\% |
| 25-39 | 51\% | 41\% | 39\% | 31\% | 21\% | 24\% | 16\% | 1\% | 2\% |
| 40-54 | 48\% | 45\% | 35\% | 32\% | 23\% | 22\% | 13\% | 1\% | 3\% |
| 55 + | 45\% | 45\% | 30\% | 31\% | 26\% | 21\% | 8\% | 3\% | 6\% |
| Education (End of) |  |  |  |  |  |  |  |  |  |
| 15- | 52\% | 39\% | 33\% | 25\% | 22\% | 20\% | 6\% | 3\% | 7\% |
| 16-19 | 49\% | 43\% | 36\% | 29\% | 23\% | 21\% | 10\% | 1\% | 4\% |
| 20+ | 45\% | 45\% | 34\% | 34\% | 24\% | 24\% | 15\% | 2\% | 2\% |
| Still studying | 50\% | 40\% | 41\% | 31\% | 25\% | 24\% | 20\% | 2\% | 1\% |
| Whil Respondent occupation scale |  |  |  |  |  |  |  |  |  |
| Self- employed | 45\% | 41\% | 34\% | 30\% | 24\% | 23\% | 15\% | 2\% | 4\% |
| Employee | 48\% | 44\% | 38\% | 34\% | 23\% | 22\% | 15\% | 1\% | 2\% |
| including managers | 46\% | 38\% | 35\% | 43\% | 28\% | 21\% | 12\% | 0\% | 2\% |
| Manual workers | 47\% | 42\% | 35\% | 26\% | 20\% | 22\% | 11\% | 1\% | 5\% |
| Not working | 49\% | 42\% | 34\% | 29\% | 24\% | 23\% | 10\% | 2\% | 4\% |

- Women give greater importance than men to the first two types of inequality: violence (W 50\%; M 46\%) and the pay gap (W 46\%; M 39\%). The same observation may be made about the small proportion of women in positions of responsibility in companies (W 32\%; M 29\%), as well as about the unequal sharing of responsibilities in families (W 25\%; M 20\%).
- Young people show the greatest awareness of the issue of trafficking in women (44\%) and the least of that of the pay gap (38\%).

## II. PAY GAP BETWEEN WOMEN AND MEN

## European averages

Q4 - Personally, based on your knowledge of the pay gap between women and men, to what extent would you say that this is a very serious, a fairly serious, a not really serious or not at all a serious problem?

- The gender pay gap is seen as a serious problem by almost 7 Europeans in 10 (69\%), with $23 \%$ of respondents considering it to be 'very serious'.
- It is seen as not really serious by $21 \%$ of respondents and not at all serious by $7 \%$.
> Differences between Member States
Q4 - Personally, based on your knowledge of the pay gap between women and men, to what extent would you say that this is a very serious, a fairly serious, a not really serious or not at all a serious problem?

- France (85\%), Belgium and Spain (both 81\%), and Sweden (80\%) are the Member States where the largest number of people consider the pay gap to be a serious problem.
- Only two Member States score less than 50\% on this item: Latvia (32\%) and Lithuania (45\%).
- Finally, Latvia is the only Member State where an absolute majority of respondents feel that the gender pay gap is not a serious problem (63\%).

## Perception of the problem and national statistics (Eurostat):

*2010 Eurostat data for 24 Member States, 2009 Eurostat data for PL, no data available for EL and EE.

- Starting from the left, the first circle comprises Member States in which, although the pay gap is small ( $10 \%$ or less), people see it as a serious or very serious problem.
- The second circle comprises Member States in which the pay gap is relatively large (more than $10 \%$ ) and in which people see it as a very serious problem.
- The third circle is composed of Member States showing a good correlation between the actual gender pay gap and the perception that people have of it.

## Sociodemographic analysis:

Q4 - Personally, based on your knowledge of the pay gap between women and men, to what extent would you say that this is a very serious, a fairly serious, a not really serious or not at all a serious problem?

|  | Total 'Serious' | Total 'Not serious' | Don't know |
| :---: | :---: | :---: | :---: |
| EU27 | 69\% | 28\% | 3\% |
| 3 Gender |  |  |  |
| Male | 62\% | 35\% | 3\% |
| Female | 76\% | 21\% | 3\% |
| 围 Age |  |  |  |
| 15-24 | 62\% | 35\% | 3\% |
| 25-39 | 67\% | 30\% | 3\% |
| 40-54 | 71\% | 26\% | 3\% |
| $55+$ | 72\% | 24\% | 4\% |
| Education (End of) |  |  |  |
| 15- | 73\% | 22\% | 5\% |
| 16-19 | 69\% | 28\% | 3\% |
| 20+ | 69\% | 28\% | 3\% |
| Still studying | 64\% | 33\% | 3\% |
| A: $=$ Respondent occupation scale |  |  |  |
| Self- employed | 64\% | 33\% | 3\% |
| Employés | 67\% | 30\% | 3\% |
| Manual workers | 68\% | 29\% | 3\% |
| Not working | 72\% | 24\% | 4\% |

- More than three in four women think that the gender pay gap is a serious problem (76\%), as against 62\% of men.
- More men (35\%) than women (21\%) think that it is not a serious problem.

## III. MEASURES TO TACKLE THE PAY GAP

## > European averages

Q6 - On average in the European Union, women earn 17.5\% less than men for work of equal value. Generally speaking, would you say that a solution to this issue needs to be found:

- Almost one in two Europeans (47\%) think that a solution to the pay gap between women and men should be found at $\boldsymbol{E} \boldsymbol{U}$ level.
- $38 \%$ of Europeans prefer the national level, whereas $11 \%$ think that such action should be taken at local or regional level.

## Differences between Member States

Q6 - On average in the European Union, women earn 17.5\% less than men for work of equal value. Generally speaking, would you say that a solution to this issue needs to be found...?

|  |  | At the European Union level | At national level | At local or regional level | Don't know |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | UE27 | 47\% | 38\% | 11\% | 4\% |
|  | BE | 61\% | 27\% | 9\% | 3\% |
|  | BG | 39\% | 38\% | 18\% | 5\% |
|  | CZ | 30\% | 45\% | 19\% | 6\% |
| $\square$ | DK | 39\% | 36\% | 17\% | 8\% |
|  | DE | 45\% | 40\% | 10\% | 5\% |
|  | EE | 28\% | 51\% | 12\% | 9\% |
| $5$ | IE | 51\% | 33\% | 13\% | 3\% |
|  | EL | 51\% | 33\% | 13\% | 3\% |
|  | ES | 73\% | 20\% | 5\% | 2\% |
|  | FR | 48\% | 40\% | 9\% | 3\% |
| 3 | IT | 54\% | 32\% | 10\% | 4\% |
|  | CY | 56\% | 20\% | 19\% | 5\% |
|  | LV | 50\% | 21\% | 24\% | 5\% |
|  | LT | 43\% | 23\% | 27\% | 7\% |
|  | LU | 61\% | 28\% | 9\% | 2\% |
| 3 | HU | 37\% | 48\% | 11\% | 4\% |
|  | MT | 40\% | 36\% | 18\% | 6\% |
| I | NL | 46\% | 40\% | 11\% | 3\% |
| $\square$ | AT | 49\% | 32\% | 14\% | 5\% |
|  | PL | 40\% | 47\% | 10\% | 3\% |
|  | PT | 65\% | 24\% | 8\% | 3\% |
| - | RO | 47\% | 34\% | 16\% | 3\% |
| , | SI | 44\% | 42\% | 9\% | 5\% |
|  | SK | 43\% | 40\% | 14\% | 3\% |
| $\square$ | FI | 32\% | 43\% | 21\% | 4\% |
| $\square$ | SE | 43\% | 37\% | 18\% | 2\% |
| $\cos$ | UK | 31\% | 50\% | 15\% | 4\% |

Highest percentage per country Lowest percentage per country
Highest percentage by item $\quad$ Lowest percentage by item

- In $\mathbf{2 1}$ of the $\mathbf{2 7}$ Member States the $\boldsymbol{E U}$ level is felt to be the most appropriate, with Spain (73\%), Portugal (65\%), Belgium (61\%) and Luxembourg (61\%) recording the highest scores.
- Six Member States - Estonia (51\%), the United Kingdom (50\%), Hungary (48\%), Poland (47\%), Czech Republic (45\%) and Finland (43\%) - consider that a solution should be found at national level.

## $>$ European averages

Q7 - In your opinion, which of the following measures would contribute the most to reducing the pay gap between women and men in (our country)?

- Respondents were also asked about the measures that would do the most to reduce the pay gap. The findings show that they do not have a clear preference on this issue.
- Europeans are divided on whether "incentives" or "penalties" would be more effective, with very similar scores being recorded for facilitating access for women and men to any type of employment (27\%), imposing financial penalties on companies that do not respect gender equality (26\%) and transparent pay scales in companies (24\%).

## Differences between Member States

Q7 - In your opinion, which of the following measures would contribute the most to reducing the pay gap between women and men in (our country)?

|  |  | Facilitating access for women and men to any type of employment (for example, men in social work and women in scientific and IT professions) | Imposing financial penalties on companies that do not respect gender equality (for example, on pay and promotion) | Transparent payscales in companies | Encouraging and supporting people who report cases of unequal pay | Other (SPONTANEUS) | Don't know |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | UE27 | 27\% | 26\% | 24\% | 16\% | 2\% | 5\% |
| 1 | BE | 25\% | 30\% | 23\% | 18\% | 1\% | 3\% |
|  | BG | 31\% | 25\% | 25\% | 11\% | 1\% | 7\% |
| , | CZ | 38\% | 23\% | 25\% | 8\% | 1\% | 5\% |
|  | DK | 35\% | 10\% | 32\% | 13\% | 4\% | 6\% |
| 0 | DE | 32\% | 16\% | 30\% | 13\% | 3\% | 6\% |
|  | EE | 22\% | 12\% | 32\% | 19\% | 3\% | 12\% |
| 3 | IE | 18\% | 31\% | 29\% | 18\% | 2\% | 2\% |
|  | EL | 26\% | 33\% | 17\% | 17\% | 3\% | 4\% |

| 6 | SE | 28\% | 24\% | 22\% | 18\% | 2\% | 6\% |
| $\sqrt{3}$ | UK | 14\% | 32\% | 27\% | 20\% | 1\% | 6\% |
| Highest percentage per country Lowest percentage per country |  |  |  |  |  |  |  |

- Facilitating access for women and men to any type of employment (EU: 27\%) is considered the most effective means of reducing the pay gap in 13 of the 27 Member States, with the highest scores being recorded in the Czech Republic (38\%), Denmark (35\%) and Poland (34\%).
- Imposing financial penalties on companies that do not respect gender equality (EU: 26\%) is the preferred measure in nine Member States, led by France (34\%), Greece (33\%) and United Kingdom (32\%).
- Transparent pay scales in companies (EU: 24\%) scores particularly highly in six Member States, namely the Netherlands (37\%), Estonia (32\%), Denmark (32\%), Austria (31\%), Finland (31\%) and Germany (30\%).
- Encouraging people who report cases of unequal pay (EU: 16\%) scores above the EU average in Malta (27\%) and Portugal (24\%).
